OUR PRECISION FOR THE DECISIVE MISSION
From the muzzle loader to the modern assault rifle

The manufacture of precision weapons in Neuhausen has a history of over 148 years of development. The production of over 1.5 million weapons represents the know-how and outstanding innovation of this traditional manufacturer.

1853 The history of the pioneers of the industry: The SIG “Schweizerische Industrie Gesellschaft” was founded as “Schweizerische Waffen-Fabriken Schaffhausen” (The Swiss Waffon Factory at Schaffhausen).
1860 Beginning of weapon manufacture: On the request of the Swiss Army the production of arms began.
1863 Successful product launch: Under the specification of the “Eidgenössischen Militärdepartements” arose the first muzzle load rifle “Präzision-Burand”, which was used by the Swiss Army.
1864 The time ahead: The SIG breechloader system “Milbank-Amsler” won recognition over 24 competitors.
1869 Milestone in history: With the “Vetterli” repeating rifle arose the best rifle of its time. Until 1870 almost 140,000 were sold to the Swiss Army.
1872 A “lightweight” conquer abroad: Finland, Chile, Peru, Columbia and China order in big numbers the ultra light 8 kg machine gun KE7.
1894 Birth of a legend: 180,000 of the P 210 pistol implemented into the Swiss Army.
1953–1957 Indestructible success guarantee: The multifunctional “SIG Assault Rifle 57” persuaded the Swiss Army to buy over 100,000 rifles.
1975 Reliable and precise: The P 220 cal. 9 mm Para also known as “Pistole 75” was adapted to the needs of the Swiss Army. 140,000 pieces were delivered.
1976 – 1980 A new time began: The range of products extended with the models P 225, P 226, P 228, P 229, P 232, P 239. At the same time began the license to manufacture the new gas pressure assault rifle family SIG SG 540 and 543 in cal. 223 and SIG SG 542 in cal. 7,62 mm NATO.
1986 – 1990 The wave of success goes on: 450,000 SIG Assault Rifles 90 (Stgw 90) were delivered to the Swiss Army. Additionally ca. 30,000 rifles of the “SIG Stgw 90 PE”, the civil version of the SIG Assault Rifle 90, were produced. Development of the new SIG Pro. pistol and 4,000 pieces of the new 40 mm weapon mounted grenade launcher “SwA 90” were purchased by the Swiss Army.
2000 Extensive changes: SIG sold off all its divisions with the exception of the engineering section. The “small arms” division went to the “Lüke & Ortmeier Group” and was known as “SAN Swiss Arms AG”.
2004 Innovative upgrading: Thanks to new laser and light modules the SIG Stgw 90, SIG Stgw 90k and SIG Stgw 04 became more effective. The range of SIG SAUER sport pistol models expanded.
2007 Forward-thinking diversification: Delivery of the SIG SG 553 to the Swiss Paratroopers. Based on the SIG SG 55X family, the SIG SAPR precision rifle in cal. 7,62 mm NATO was developed. The first of these rifles goes to the Romanian Special Forces.
2009 – 2011 New family members: After successful testing of the new SG 751 SAPR it was marketed. Through the SAN 551 (.50 BMG) the product line of precision rifles was expanded. The SG 953 was given a new facelift. New materials and compatibility to other systems (M16 / M4 magazines) completed the modular structure.
2013 Family expansion: With the SG 553 R in cal. 7,62 x 39 the SG 553 R also accepts the most common AK 47 magazines.
2017 Platform is renewed: our platform is again extended with the SG 553 BK in caliber .300 AAC Blackout (.82 x 35) and comes with our own SAN suppressor. Especially for the SG 553 BK developed suppressor allow us to shoot subsonic and supersonic Ammunition.

Our innovation for tomorrow is based on our immense experience in the past.

The SIG 40 mm grenade launcher can be used as a stand-alone or weapon mounted. Its wide variety of lethal and less-lethal ammunition makes it multi-purpose.

The grenade launcher is accurate, lightweight, compact and easy to use.
The .300 BLK, also known as 7.62 × 35 mm, is a rifle cartridge, with similar ballistics of the Russian 7.62 × 39 mm cartridge.

The new SG 553 BK combines the highest Swiss precision technology with the dynamics of a .30 cartridge.

NEW
G2X™ TACTICAL
A compact single-output polymer flashlight that uses a high-efficiency LED to provide a brilliant 220-lumen tactical beam. Features a press-for-memory on and twist-for-constant-on tactical tailcap switch.

Output: 200 lumens
Runtime: 2.5 hours

F2X FURY®
This dual-output pocket-sized searchlight is made of sculpted aerospace aluminum and features a virtually fail-proof LED that delivers 1000 lumens of brilliant output and 100 lumens of useful output on its low setting. Activates via a click-type tailcap switch.

Output: 1000 lumens
Output: 100 lumens
Runtime: 90 minutes
Runtime: 1.5 hours

M300 SCOUT LIGHT®
Powered by one 123A® battery, this compact WeaponLight attaches to Picatinny rails via an integral thumbscrew clamp. Its high-performance LED produces a 300-lumen beam with plenty of reach and enough spread to preserve situational awareness. Compact but powerful.

Output: 300 lumens
Runtime: 1.75 hours

X300® ULTRA
The ultimate pistol light that also securely mounts to rail-equipped long guns. The X300 Ultra utilizes an ultra-high output LED and beam-focusing TR lens to produce a brilliant 500-lumen beam with extended reach and plenty of surrounding light for situational awareness. Own the best.

Output: 500 lumens
Runtime: 1.75 hours

X400® ULTRA
The X400 Ultra combines stunning white-light illumination with a bright red- or green-laser sight (depending on the model) that mounts securely to handgrips and rails on long guns. It’s ideal for close-to-medium-range applications for law enforcement, military, and personal defense.

White-Light Output: 1200 lumens
White-Light Runtime: 1.5 hours

X400® V1Rc
This is a highly versatile dual-spectrum WeaponLight that boasts a Class 1 infrared-laser sight for use with night vision devices. This groundbreaking X400 model—which mounts to handgrip and long guns with Picatinny rails—also features a white-light and an infrared LED in its V- Series head to meet virtually any mission requirement.

White-Light Output: 1200 lumens
IR Output: 1200 mW
Laser Output: 0.7 mW
White-Light Runtime: 1.5 hours
IR Runtime: 4 hours
Laser Runtime: 24 hours

XC1
The XC1 is SureFire’s smallest, most lightweight handgun light. It features a recyclable LED that’s focused by a multi-faceted reflector to create our brand 280-lumen MaxVision Beam® perfect for illuminating and identifying threats at close range.

Output: 280 lumens
Runtime: 1.5 hours

EP4 SONIC DEFENDERS® PLUS
Filtered EP4 earplugs provide extensive hearing protection while offering the ability to hear ambient sounds and conversations. They feature triple-flanged stems—made from hypoallergenic polymer—and patented EarLock® retention rings that comfortably and securely lock the earplugs in place.

Noise Reduction Rating (NRR): 26 dB

EP7 SONIC DEFENDERS® ULTRA
EP7 Sonic Defenders also protect your hearing without interfering with your ability to hear ambient sounds (with filters out) and use patented EarLock® rings to comfortably stay in place. Their soft memory-foam Campfire™ Cush Tip provide a higher Noise Reduction Rating (NRR) than flanged-stem models.

Noise Reduction Rating (NRR): 28 dB

SUREFIRE 123A LITHIUM BATTERIES
Optimized for use in SureFire illumination tools, these premium-quality batteries provide the power that high-draw SureFire lights need, along with voltage maintenance, a long shelf life, and built-in fault and heat protection to ensure your safety!
OUR MISSION IS TO PRODUCE INNOVATIVE SOLUTIONS CONTAINING A MINIMUM OF PARTS.

Aimpoint® Micro T-2
High Performance Close Combat Reflex Sight

The new sight offers additional features and enhanced performance. Since its introduction in 2007, the Aimpoint Micro sight has become the worldwide standard for compact reflex sights. Law enforcement and military end users have embraced this sight for its compact size, durability, and extremely long battery life. Product reviews with professional end users identified a series of desired product enhancements that have now been added to this new product. These changes include: a new sight housing which allows the addition of front and rear protective flip covers and anti-reflective devices; additional physical protection for the sight’s adjustment turrets; increased durability added to the mount threading; and increased ruggedness for the sight’s internal electronic components.

- Magnification: 1x, unlimited eye relief
- Clear Aperture: 20mm
- Aiming Dot Size: 2 MOA (0.6 mRad)
- Power: 3V battery, Type CR2032
- Dimensions: (L x W x H) 68 mm x 41 mm x 36 mm (2.7" x 1.6" x 1.4") Sight only
  77 mm x 42 mm x 46 mm (3" x 1.6" x 1.8") Sight with Mount & Flip-up lens covers
- Mass: 96 gr (3.4 oz) Sight only, 139 gr (4.9 oz) Sight with Mount & Flip-up lens covers
